DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 42-111, drawn to a process for the production of a polymer layer of a pipe and method of producing a pipe.

Group II, claim(s) 112-116, drawn to a pipe.

2. Evidence of lack of unity between groups I and II is found in US 6,106,761 wherein it is found to disclose the features of instant claim 112 (col. 2, lines 7-20, directed to "Finnish laid-open specification 94106"). As such, the special technical features of the claimed invention are not found to define a contribution over the prior art under PCT Rule 13.2.
3. A telephone call was made to Joseph Contrera on November 20, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made. Joseph Contrera requested a written restriction requirement.
4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and

Art Unit: 1772

specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
